

Hippo

Hippos
are most active
at night when they
forage for
food

Hippos
can grow up to 5
metres long and
weigh up to 4500kg

Hippos are
great
in water. They
can hold
their breath
under water
for over 5
minutes.

Hippos are responsible for over 500 human deaths every year, they are incredibly strong. A hippos jaw strength is only beaten by crocodiles in modern times.
